## WORK EXPERIENCE

### Chief Technical Officer Globify Ltd.

05/2011 - Present

#### Achievements/Tasks

- Worked on a web application that utilized HTML, JavaScript, CSS3, PHP, MySQL, Amazon Web Services, third party API's and Elastic Search.
- Actively managed remote teams utilizing the Scrum processes with Atlassian Jira, and Trello.
- As a lead full stack developer I created many in-house and user facing programs including a multi-user wiki dictionary, flashcard app, subtitle editor, and an enterprise application with multiple permission levels and groups
- Developed many back-end scripts to manipulate large datasets and interface with many different API's, and designed and implemented in-house API's
- Built a WordPress plugin to interface with our back-end and display YouTube videos with customized subtitles

### Research Assistant University of the West of Scotland

01/2009 - 12/2009

Remote

Lead developer

#### Achievements/Tasks

- Integrated Learning Management tools with SecondLife
- Built a 3D Virtual World using various editing tools such as Photoshop, 3d modeling software, and in-world tools
- Learned SecondLife's internal Scripting language, and created in-world educational tools that interfaced with external websites, for teachers using Second Life to teach foreign languages
- Built in-world communication devices that allowed teachers to record their students inworld chats. Also created a Zombie Question / Answer game
- Programmed and Built a free Game Buzzer for in-world quizzes
- Built an Oil Spill simulation for teachers and students to use
